JOB EXPERIENCE

FRONT END DEVELOPER

June 2021 – March 2023

Baufest at ICBC Bank

I worked as a Front-End referent developing and solving Issues on Mobile, Desktop and BackOffices for the Loan Cell with Angular, TypeScript, HTML and client's framework. In addition to tools like Jira, Miro and Teams. Point to highlight:

- Consistency with client's brand guidelines and UI standards.
- Collaborate with UX/UI designers, Back-End developers and PMs to implement new features and improvements to existing ones.
- Carry out documentation, code reviews, unit tests and onboarding of new co-workers to guarantee the quality of the code and compliance with best practice.
- Work with Agile methodology and resolve doubts from other cells.

ACADEMIC EXPERIENCE

FULL STACK DEVELOPER

February 2021

Moba(Fintech Mobile App) – Final Project

It allows you to recharge credit, has its own virtual card and stands out for its interoperability with another virtual wallet. In addition, it allows the sending of credit to unregistered users, share the transfer receipt by WhatsApp, statistics of the movements made and a pleasant UI for a better user experience.
